GM's Board of Directors at a time closer to GM's distribution of the solicitation statement prospectus pursuant to which GM stockholders will be asked to approve the transactions.

The spin-off of the Hughes defense business and merger with Ravtheon would have an indicated total value of \$9.5 billion to GM and its common stockholders based on stock prices as of the announcement date. That value would consist of a combination of approximately \$4.7 billion of total debt obligations of the Hughes defense business at the time of the merger, and \$4.8 billion of indicated value of Hughes defense stock to be distributed to common stockholders (after giving affect to the merger based on the market price of Raytheon common stock as of the announcement date of \$47.00). The merger terms provide that the total debt of the Hughes defense business will be adjusted to reflect variations in the average market price of Raytheon stock, subject to specified limits, so that the two components of value will total \$9.5 billion so long as such market price is in a range of between \$44.42 and \$54.29 per share. Substantially all of such debt would be incurred immediately prior to the spin-off, with the proceeds used principally to fund the telecommunications and space business of Hughes.

Consummation of the transactions described previously is subject to various contingencies, including regulatory clearances and approval by GM common stockholders. Additional information regarding these planned transactions is included in Note 18 to the Consolidated Financial Statements. These planned transactions had no impact on 1996 financial results.

The planned transactions described previously are intended to result in the achievement of several strategic objectives. The merger of the Hughes defense business with Raytheon would create a stronger defense electronics company which would be able to more effectively compete for new business in an industry where significant consolidation is

occurring. At the same time, the integration of Delco Electronics and Delphi Automotive Systems would combine advanced electronics capability with components and systems expertise, and would be expected to result in reduced costs. Hughes Electronics would continue to hold and operate the telecommunications and space business. This would allow Hughes management to focus on this business segment and the capital infusion would allow it to take advantage of growth opportunities in this very competitive industry. The strategy of this business is to continue to expand its offerings from being primarilv a supplier of hardware to becoming a provider of hardware and video, voice, and data services worldwide. This strategy requires significant current and future investment in order to maintain and enhance the segment's competitive position with respect to existing products and to take advantage of the growth opportunities presented, as well as the formation of strategic alliances to compete in the very competitive global marketplace.

RESULTS OF OPERATIONS

Revenues. Hughes reported record revenues of \$15,917.9 million in 1996, a 7.5% increase over 1995. Revenues in 1995 were \$14,807.9 million, an increase of 5.0% compared with 1994 revenues of \$14,099.4 million. The increase in 1996 revenues was largely the result of continued growth in the Telecommunications and Space segment and increased revenues in the Aerospace and Defense Systems segment, partially offset by lower Automotive Electronics revenues caused in part by work stoppages at various GM production locations during the year. 1995 revenue growth was driven by the Automotive Electronics and Telecommunications and Space segments. (Pro forma segment information is presented on page 39).

TELECOMMUNICATIONS AND SPACE - Revenues in the Telecommunications and Space segment were \$4,114.9 million in 1996, a 33.1% increase over 1995. and \$3,092.7 million in 1995. a 19.1% increase over 1994 revenues of \$2,596.2 million. The increases in both years were primarily due to continued expansion of the DIRECTV subscriber base, increased sales of commercial satellites and cellular communications equipment, and increased video distribution revenues from Galaxy' satellite transponders.

AUTOMOTIVE ELECTRONICS - Revenues in the Automotive Electronics segment decreased 3.8% in 1996 to \$5,350.8 million from \$5,561.3 million in 1995. The decline was principally due to a decrease in GM vehicles produced in the United States and Canada (excluding joint ventures) primarily related to the United and Canadian Auto Workers' (UAW and CAW, respectively) strikes offset, in part, by an increase in Hughes-supplied electronic content in these vehicles from \$888 per vehicle to \$906 per vehicle and an increase in international and non-GM-NAO sales from \$841 million in 1995 to \$1,010 million in 1996. Revenues increased \$339.6 million, or 6.5%, in 1995 from \$5,221.7 million in 1994. 1995 revenue growth was attributed to an increase in Hughes-supplied electronic content in GM vehicles produced in North America to \$888 in 1995 from \$857 in 1994, and an increase in sales to international and non-GM-NAO customers to \$841 million in 1995 from \$672 million in 1994. Vehicle production remained relatively unchanged between 1994 and 1995.

AEROSPACE AND DEFENSE SYSTEMS - Aerospace and Defense Systems segment revenues were \$6,338.4 million in 1996, a 6.6% increase from 1995 revenues of \$5,945.4 million. The growth was primarily attributable to additional revenues resulting from

the December 1995 acquisition of Hughes Defense Communications (formerly Magnavox Electronic Systems Company) and the build-up of newer programs including Desktop V. Wide Area Augmentation System and Land Warrior. 1995 revenues decreased \$78.2 million, or 1.3%, from 1994 revenues of \$6,023.6 million. The decline was principally due to lower production rates on several missile programs, partially offset by the additional revenues related to the 1995 acquisition of CAE-Link Corporation.

OTHER INCOME - Included in revenues is other income of \$173.8 million, \$93.6 million, and \$37.1 million for 1996, 1995, and 1994, respectively. 1996 includes the \$120.3 million pre-tax gain from the sale of a 2.5% equity interest in DIRECTV to AT&T. 1995 and 1994 included pre-tax charges of \$40.0 million and \$35.0 million, respectively, for the estimated losses on disposition of certain non-strategic business units. Also included in 1995 was \$35.9 million of revenue earned for providing services to GM.

Operating Profit. Operating profit was \$1,594.3 million in 1996, \$1,667.3 million in 1995, and \$1.630.4 million in 1994. Operating profit margins, as a percentage of net sales, were 10.1%, 11.3%, and 11.6%, in 1996, 1995, and 1994, respectively. The decline in profitability in 1996 compared to 1995 was primarily attributable to the lower GM production volumes related to the UAW and CAW strikes and continued price reductions in the Automotive Electronics segment offset in part, by the increased profitability in the Telecommunications and Space segment. Also offsetting the 1996 decline in profitability were the reduced operating losses at Hughes-Avicom International, Inc. Operating profit improved in 1995 largely due to a continued emphasis on cost reduction efforts, most notably in the Automotive Electronics and Aerospace and Defense Systems seg-

ments, and the overall growth in revenues, partially offset by a planned increase in operating expenses associated with DIRECTV. The 1995 operating profit margin decline was attributable primarily to the DIRECTV operating expense increase which more than offset the margin improvements in the two other segments.

TELECOMMUNICATIONS AND SPACE - Operating profit for 1996 was \$259.8 million, a 37.3% increase from \$189.2 million reported in 1995. The 1996 increase was largely a result of the revenue increases previously discussed and reduced mobile telephony satellite development costs offset, in part, by operating losses related to the start of service by the Company's DIRECTV business in Latin America. Operating profit in 1995 decreased 30.2% from 1994 operating profit of \$271.0 million. The 1995 decline in operating profit was principally due to increased operating expenses associated with the expansion of DIRECTV and increased development costs on a geostationary satellite mobile telephony product line. Operating profit margins were 6.5% in 1996, 6.2% in 1995, and 10.3% in 1994. After 1996, operating profit margins in the Telecommunications and Space segment are expected to increase as DIRECTV's subscriber base grows.

AUTOMOTIVE ELECTRONICS - In 1996, operating profit was \$654.0 million compared with \$869.0 million in 1995. The decline was mostly due to the reduced production volumes, continued price reductions resulting from competitive pricing in connection with GM's global sourcing initiative, and the impact from continued investment in international expansion. 1995 operating profit increased \$74.2 million, or 9.3%, as compared to 1994 operating profit of \$794.8 million. The improvement in profitability in 1995 was attributable not only to increased revenues, but also an aggressive cost

reduction program.

As the principal supplier of automotive electronics to General Motors' North American Operations unit (GM-NAO), Hughes' sales of automotive electronics will continue to be heavily dependent on General Motors production of vehicles in North America, the level of Hughes-supplied electronic content per GM vehicle, the price of such electronics, and the competitiveness of Hughes' product offerings. In this regard, it is anticipated that competition through GM's global purchasing process will negatively impact Hughes' sales to GM-NAO and result in a decline in the portion of GM-NAO automotive electronics supplied by Hughes. The segment's strategy is to aggressively reduce costs in order to minimize the effect of continuing price reductions and to manage the loss of GM-NAO market share by offering competitive products which increase electronic functionality through a focus on safety, security, communications, and convenience. The segment will also seek to improve its systems capability and cost competitiveness both internally and by developing key design, manufacturing, and marketing alliances and other relationships with mechanical and electrical automotive component suppliers.

The international market for automotive electronic products is also highly competitive. The segment has refined its strategy for this market to focus on profitable growth as well as increased market share, and accordingly, will seek to enhance the cost competitiveness of its international operations.

The competitive environment described above is making it increasingly difficult to maintain the level of operating profit margins realized in this segment in the past. Beyond 1996, operating margins are expected to be lower than recent historical levels as price and volume declines associated with GM's global sourcing initiatives more than offset Hughes' ability to achieve cost reductions. In response to the increased pressure on margins and to enhance future competitiveness, management will take action to reduce the cost structure of the business. As a result of the factors described above, the operating margin is expected to decline further in 1997 to low double digits, and then show modest improvement in 1998 and 1999

Aerospace and Defense Systems - Operating profit was \$694.7 million in 1996 compared to \$688.0 million in 1995 and \$663.6 million in 1994. The operating profit margin for 1996 declined to 11.0% from 11.7% in 1995 primarily due to a continued shift from production programs to engineering and development programs, and growth in information systems and services revenues. The operating profit margin for 1995 increased to 11.7% from 11.0% largely due to a provision taken in 1994 for certain air traffic control contracts, partly offset by reduced revenues in 1995. Future operating profits could be adversely impacted by further reductions in the U.S. defense budget.

Costs and Expenses. Selling, general, and administrative expenses were \$1,505.6 million in 1996, \$1,234.2 million in 1995, and \$1.018.3 million in 1994. The increases were principally due to the continued expansion of DIRECTV, both in the U.S. and internationally, and increased international sales activities at Delco Electronics.

The effective income tax rate was 34.5%, 36.8%, and 34.7% in 1996, 1995, and 1994, respectively. The decrease in the effective income tax rate in 1996 was due primarily to the favorable resolution of certain tax contingencies while the effective income tax rate in 1994 was favorably impacted by the recognition of capital loss carryforward benefits.

Earnings. Hughes' 1996 earnings were \$1,151.2 million, or \$2.88 per share of GM Class H common stock, compared with 1995 earnings of \$1,107.8 million, or \$2.77 per share, and 1994 earnings of \$1,049.2 million, or \$2.62 per share. Earnings in 1994 included the unfavorable effect of an accounting change for postemployment benefits. Excluding the accounting change, Hughes' earnings in 1994 would have been \$1,079.6 million, or \$2.70 per share

Backlog. The 1996 year-end backlog of \$15,100 mil lion increased from \$14,929 million at the end of 1995, primarily due to record backlog in the Aerospace and Defense Systems segment. 1995 year-end backlog increased from the \$13,210 million at the end of 1994, primarily due to increased satellite orders in the Telecommunications and Space segment. A portion of the backlog is subject to appropriation decisions by the U.S. Government subsequent to award. In addition, Hughes' contracts with the U.S. Government are subject to termination by the Government either for its convenience or for default by Hughes. Sales to the U.S. Government may be affected by changes in acquisition policies. budget considerations, changing concepts in national defense, spending priorities, and other factors that are outside of Hughes' control.

Special Provision for Restructuring. In 1992. Hughes recorded a special charge of \$749.4 million (aftertax), for the restructuring of Hughes' operations. The special charge comprehended a reduction of Hughes' worldwide employment, a major facilities consolidation, and a reevaluation of certain business lines that no longer met Hughes' strategic objectives. Restructuring costs of \$92.4 million, \$208.8 million, and \$228.3 million were charged against the reserve during 1996, 1995, and 1994, respectively. In addition, in 1994, the restructuring reserve was increased by \$35.0 million, primarily due to changes in the estimated loss on disposition of a subsidiary. The remaining liability at December 31, 1996 of \$42.0 million relates primarily to reserves for excess

facilities and other site consolidation costs.

Approximately \$40.7 million of this amount will require future cash outflows. It is expected that these costs will be expended predominantly during the next year.

- Accounting Changes. Effective January 1, 1996,
Hughes adopted Statement of Financial Accounting
Standards (SFAS) No. 123, Accounting for StockBased Compensation, and as permitted by this standard, will continue to apply the recognition and
measurement principles of Accounting Principles
Board Opinion No. 25 to its stock options. Hughes
has calculated the pro forma effects of applying
SFAS No. 123 and determined that such effects are
not significant in relation to reported net income
and earnings per share.

Effective January 1, 1996, Hughes also adopted SFAS No. 121, Accounting for the Impairment of Long-Lived Assets and for Long-Lived Assets to Be Disposed Of. This Statement establishes accounting standards for the impairment of long-lived assets, certain identifiable intangibles, and goodwill related to those assets to be held and used, and for long-lived assets and certain identifiable intangibles to be disposed of. The adoption of this new accounting standard did not have a material effect on Hughes' consolidated operating results or financial position.

Effective January 1, 1994, Hughes adopted SFAS No. 112, Employers' Accounting for Postemployment Benefits. The Statement requires accrual of the costs of benefits provided to former or inactive employees after employment, but before retirement. The unfavorable cumulative effect of adopting this Standard was \$30.4 million, net of income taxes of \$19.2 million, or \$0.08 per share of GM Class H common stock. The charge primarily related to extended disability benefits which are accrued on a service-driven basis.

LIQUIDITY AND CAPITAL RESOURCES

Cash and Cash Equivalents. Cash and cash equivalents were \$1,161.3 million at December 31, 1996, an increase of \$21.8 million from December 31, 1995. Operating activities generated cash of \$1,199.4 million as Hughes achieved another year of record earnings. Additional cash was provided by proceeds from the sale and leaseback of satellite transponders with General Motors Acceptance Corporation, and proceeds from the sale of a minority interest in DIRECTV of \$137.5 million. The increases in cash were offset by the cash used to fund capital expenditures, repay notes and loans payable and pay dividends to General Motors.

In 1995, cash and cash equivalents decreased \$362.3 million to \$1,139.5 million at December 31, 1995, from \$1,501.8 million at December 31, 1994. Operating activities generated cash of \$986.2 million, however, cash used to fund capital expenditures, pay dividends to General Motors, and acquire new businesses more than offset the cash generated by operating activities.

In the third quarter of 1996, Hughes reported that cash flows in 1997 and beyond were expected to be negatively impacted by a change in the credit terms between Hughes and GM-NAO for purchases of automotive electronics. With the announcement of the planned transactions in January 1997, (see Note 18 to the Consolidated Financial Statements), implementation of the change in credit terms has been deferred pending the consummation of such planned transactions.

Liquidity Measurement. As a measure of liquidity, the current ratio (ratio of current assets to current liabilities) was 1.69 at December 31, 1996, 1.58 at December 31, 1995, and 1.76 at December 31, 1994. The increase from 1995 to 1996 was principally due to the repayment of certain notes and loans payable.

The decrease from 1994 to 1995 was principally due to the decrease in cash described above and increases in the notes and loans pavable balance, primarily caused by a loan related to an acquisition. (See Note 13 to the Consolidated Financial Statements.)

Property and Equipment. Property, net of accumulated depreciation, increased \$147.4 million in 1996 while telecommunications and other equipment, net of accumulated depreciation, decreased \$41.6 million, primarily due to the sale and leaseback of GIIIR which more than offset additional expenditures related to the Galaxy satellite fleet.

Expenditures for property and equipment were \$652.3 million in 1996 compared with \$545.7 million and \$490.5 million in 1995 and 1994, respectively. Management anticipates that capital expenditures in 1997 will increase approximately \$100 million over 1996 and will be financed primarily from cash provided by operating activities.

Telecommunications and other equipment expenditures were \$187.9 million in 1996 compared with \$274.6 million and \$255.8 million in 1995 and 1994, respectively. Management anticipates that telecommunications and other equipment expenditures in 1997 will increase significantly compared with 1996 and will be financed primarily from cash provided by operating activities.

TELECOMMUNICATIONS AND SPACE - Capital expenditures, including expenditures related to telecommunications and other equipment, increased to \$449.8 million in 1996 from \$436.5 million in 1995 and \$399.3 million in 1994. The 1996 capital expenditures increase reflects additions to the Galaxy satellite fleet and construction of the California Broadcast Center, an uplink facility that supports Hughes' DIRECTV business in Latin America. The increase in 1995 was due primarily to additions to the Galaxy satellite fleet.

AUTOMOTIVE ELECTRONICS - Capital expenditures decreased to \$196.0 million in 1996, compared with \$264.7 million in 1995, and \$166.4 million in 1994. The decrease in the 1996 capital spending reflects the impact of delays in engineering capital expenditures and the higher than normal level of expenditures in 1995. The increased capital spending in 1995 reflects expenditures for additional program requirements related to new product changes associated with the 1996 model year combined with a decrease in tooling cost recoveries.

AEROSPACE AND DEFENSE SYSTEMS - Capital expenditures in the Aerospace and Defense Systems segment for 1996, 1995, and 1994 were \$171.1 million, \$109.8 million, and \$159.5 million, respectively. The 1996 increase relates to capital expenditures to support expanding business requirements. The 1995 decrease was due to the high level of expenditures in 1994 related to the consolidation of facilities in an effort to increase the operational efficiencies of manufacturing and engineering activities.

Debt and Capitalized Leases. Long-term debt and capitalized leases were \$34.5 million at December 31, 1996, a decrease from \$258.8 million at December 31, 1995, and \$353.5 million at December 31, 1994, reflecting scheduled principal repayments and the reclassification of certain amounts to current liabilities. The ratio of long-term debt and capitalized leases to the total of such debt and pro forma stockholder's equity decreased to 0.5% in 1996 from 4.4% in 1995 and 6.6% in 1994.

As discussed further, additional debt will be incurred in conjunction with the PanAmSat merger. It is anticipated that a portion of this debt would be repaid from cash expected to be received pursuant to the planned transactions. (See Note 18 to the Consolidated Financial Statements.)

Other Balance Sheet Items. In evaluating both its pension and retiree medical liabilities, Hughes recognizes the impact of changes in long-term interest rates by adjusting the discount rate used in determining the actuarial present values of the projected benefit obligations. In 1996, the weighted-average discount rate for Hughes' non-automotive pension obligations increased from 7.25% to 7.5% and the weighted-average discount rate for Hughes' other postretirement benefits increased from 7.25% to 7.56%.

Acquisitions and Divestitures. In December 1996. Hughes announced that it had reached an agreement to acquire the Marine Systems Division of Alliant Techsystems, Inc. for \$141.0 million in cash. The Marine Systems Division is a leader in lightweight torpedo manufacturing and the design and manufacturing of underwater surveillance, sonar and mine warfare systems. The acquisition was completed in the first quarter of 1997.

In September 1996, Hughes and PanAmSat Corporation entered into an agreement to merge their respective satellite services operations into a new publicly-held company. Hughes would contribute its Galaxy satellite services business in exchange for a 71.5% interest in the new company. Current PanAmSat stockholders would receive a 28.5% interest in the new company and \$1.5 billion in cash. Such cash consideration and other funds required to consummate the merger are expected to be funded by new debt financing totaling \$1.725 billion. This debt financing is expected to be provided by Hughes, which currently intends to borrow such funds from General Motors.

For accounting purposes, this transaction would be treated as a partial sale of the Galaxy business by Hughes and would result in a one-time, nonrecurring gain. The amount of this gain depends on several variables, but is expected to be between \$400 and \$600 million before tax. PanAmSat is a leading

provider of international satellite services. The transaction, which is contingent upon receiving certain regulatory approvals, is expected to close during the second quarter of 1997

In March 1996, Hughes sold a 2.5% equity interest in DIRECTV, a wholly-owned subsidiary of Hughes, to AT&T for \$137.5 million, with options to increase their ownership interest under certain conditions. The sale resulted in a \$120.3 million pretax gain which is included in other income.

In February 1995, Hughes completed the acquisition of CAE-Link Corporation, an established supplier of simulation, training, and technical services. primarily to the U.S. military and NASA, for \$176.0 million. In December 1995, Hughes acquired Magnavox Electronic Systems Company, a leading supplier of military tactical communications, electronic warfare, and command and control systems, for \$382.4 million

During 1995, Hughes divested several non-strategic enterprises resulting in aggregate proceeds of approximately \$127.2 million and a net gain of approximately \$21.9 million. Also in 1995, Hughes recorded a \$40.0 million charge for the estimated loss on disposition of a business unit and completed the divestiture of Hughes LAN Systems, for which a pre-tax charge of \$35.0 million was taken in 1994.

Dividend Policy. As discussed in Note 7 to the Consolidated Financial Statements, it is GM's current policy to pay aggregate annual cash dividends on the GM Class H common stock approximately equal to 35% of the Available Separate Consolidated Net Income of Hughes for the prior year. In January 1997, the Board of Directors of GM increased the quarterly dividend on GM Class H common stock from \$0.24 per share to \$0.25 per share. It is anticipated that if the previously described Hughes transactions are consummated, the General Motors Board of Directors will adopt a

dividend policy relating to the new Class H common stock which the Board deems to be appropriate in light of the capital needs and growth opportunities of the Hughes telecommunications and space business and generally commensurate with that of other companies in the telecommunications and space business having similar capital needs and growth opportunities.

Security Ratings. Hughes' security ratings are tied to the security ratings of General Motors.

In October 1996, Standard & Poor's Ratings Services, a division of McGraw-Hill Companies, Inc. (S&P), revised its outlook on Hughes from stable to developing as a result of the uncertainty with respect to GM's investment strategy related to Hughes. S&P indicated that the developing outlook reflects the possibility that if a significant change in the relationship between GM and Hughes were to occur, the credit quality of Hughes could be either favorably or adversely affected, depending upon the nature of the transaction pursued.

In November 1996 and January 1997, S&P affirmed its long-term debt rating of Hughes at A-. The S&P A- credit rating is the seventh highest within the 10 investment grade ratings available from S&P for long-term debt, based on a strong capability to pay interest and repay principal, although somewhat more susceptible to the adverse effects of changes in circumstances and economic conditions than debt in higher rated categories. Additionally, S&P also affirmed its A.2 rating on Hughes' commercial paper. S&P's ratings outlook for Hughes remains developing.

In September 1996, Moody's Investors Service. (Moody's), confirmed the long-term credit rating of Hughes at A.3, seventh highest within the 10 investment grade ratings available from Moody's for longterm debt. Moody's defines A.3 bonds as having "upper-medium grade" quality. Moody's rating for Hughes' commercial paper remained unchanged at P-2. The rating indicates that the issuer has a strong ability for repayment relative to other issuers.

Following GM's and Hughes' January 1997 announcement with respect to the Hughes business segments (see Note 18 to the Consolidated Financial Statements), both S&P and Moody's reaffirmed their current ratings and outlook for Hughes' securities. Moody's, however, put Hughes' ratings on review for possible downgrade.

Debt ratings by the various rating agencies reflect each agency's opinion of the ability of issuers to repay debt obligations punctually. Lower ratings generally result in higher borrowing costs. A security rating is not a recommendation to buy, sell, or hold securities and may be subject to revision or withdrawal at any time by the assigning rating organization. Each rating should be evaluated independently of any other rating.

SUPPLEMENTAL DATA

The Consolidated Financial Statements reflect the application of purchase accounting adjustments as described in Note 1 to the Consolidated Financial Statements. However, as provided in GM's Certificate of Incorporation, the earnings attributable to GM Class H common stock for purposes of determining the amount available for the payment of dividends on GM Class H common stock specifically excludes such adjustments. More specifically, amortization and disposal of these intangible assets associated with GM's purchase of Hughes Aircraft Company amounted to \$122.3 million in 1996. \$159.5 million in 1995, and \$123.8 million in 1994. The 1995 amount included a \$36.1 million charge, included in other income, for the write-off of such purchase accounting adjustments related to the disposition of certain non-strategic business units. Such amounts were excluded from the earnings available for the payment of dividends on GM Class H common stock and were charged against the

earnings available for the payment of dividends on GM's \$1-3/3 par value stock. Unamortized purchase accounting adjustments associated with GM's purchase of Hughes Aircraft Company were \$2,723.5 million, \$2,845.8 million, and \$3,005.3 million at December 31, 1996, 1995, and 1994, respectively.

In order to provide additional analytical data to the users of Hughes' financial information, supplemental data in the form of unaudited summary pro forma financial data are provided. Consistent with the basis on which earnings of Hughes available for the payment of dividends on the GM Class H common stock is determined, the pro forma data exclude purchase accounting adjustments related to General Motors' acquisition of Hughes Aircraft Company. Included in the supplemental data are certain financial ratios which provide measures of financial returns excluding the impact of purchase accounting adjustments. The pro forma data are not presented as a measure of GM's total return on its investment in Hughes.

⁽⁴⁾ Income (Loss) before Income Taxes divided by average total assets.

R ESPONSIBILITIES FOR CONSOLIDATED FINANCIAL STATEMENTS AND INDEPENDENT AUDITORS' REPORT

RESPONSIBILITIES FOR CONSOLIDATED FINANCIAL STATEMENTS

The following consolidated financial statements of Hughes Electronics Corporation and subsidiaries were prepared by management which is responsible for their integrity and objectivity. The statements have been prepared in conformity with generally accepted accounting principles and, as such, include amounts based on judgments of management.

Management is further responsible for maintaining a system of internal accounting controls that is designed to provide reasonable assurance that the books and records reflect the transactions of the companies and that its established policies and procedures are carefully followed. Perhaps the most important feature in the system of control is that it is continually reviewed for its effectiveness and is augmented by written policies and guidelines, the careful selection and training of qualified personnel, and a strong program of internal audit.

Deloitte & Touche LLP, an independent auditing firm, is engaged to audit the consolidated financial statements of Hughes Electronics Corporation and subsidiaries and issue reports thereon. The audit is conducted in accordance with generally accepted auditing standards which comprehend the consideration of internal accounting controls and tests of transactions to the extent necessary to form an independent opinion on the financial statements prepared by management. The Independent Auditors' Report appears below.

The Board of Directors, through its Audit Committee, is responsible for assuring that management fulfills its responsibilities in the preparation of the consolidated financial statements and engaging the independent auditors. The Committee reviews the scope of the audits and the accounting principles being applied in financial reporting. The independent auditors, representatives of management, and the internal auditors meet regularly (separately and jointly) with the Committee to review the activities of each, to ensure that each is properly discharging its responsibilities, and to assess the effectiveness of the system of internal accounting controls. It is management's conclusion that the system of internal accounting controls at December 31, 1996 provides reasonable assurance that the books and records reflect the transactions of the companies and that its established policies and procedures are complied with. To ensure complete independence, Deloitte & Touche LLP has full and free access to meet with the Committee, without management representatives present, to discuss the results of the audit, the adequacy of internal accounting controls, and the quality of the financial reporting.

Chairman of the Board

and Chief Executive Office

Vice Chairman and Chief Kinancial Officer Tevame & aux Senior Vice President. Treasurer and Controller

INDEPENDENT AUDITORS' REPORT

To The Stockholder and Board of Directors of Flughes Electronics Corporation:

We have audited the Consolidated Balance Sheet of Hughes Electronics Corporation and subsidiaries as of December 31, 1996 and 1995 and the related Consolidated Statement of Income and Available Separate Consolidated Net Income and Consolidated Statement of Cash Flows for each of the three years in the period ended December 31, 1996. These financial statements are the responsibility of Hughes Electronics Corporation's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with generally accepted auditing standards. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis

In our opinion, such financial statements present fairly, in all material respects, the financial position of Hughes Electronics Corporation and subsidiaries at December 31, 1996 and 1995 and the results of their operations and their cash flows for each of the three years in the period ended December 31, 1996 in conformity with generally accepted accounting principles.

As discussed in Note 1 to the consolidated financial statements, effective January 1, 1994 Hughes Electronics Corporation changed its method of accounting for postemployment benefits.

N OTES TO CONSOLIDATED FINANCIAL STATEMENTS

NOTE 1: SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Organization and Consolidation. The consolidated financial statements include the accounts of Hughes Electronics Corporation (Hughes) and its domestic and foreign subsidiaries that are more than 50% owned. Investments in associated companies in which at least 20% of the voting securities is owned are accounted for under the equity method of accounting.

Effective December 31, 1985, General Motors Corporation (General Motors or GM) acquired Hughes Aircraft Company and its subsidiaries for \$2.7 billion in cash and cash equivalents and 100 million shares of GM Class H common stock having an estimated value of \$2,561.9 million, which carried certain guarantees.

On February 28, 1989, GM and the Howard Hughes Medical Institute (Institute) reached an agreement to terminate GM's then-existing guarantee obligations with respect to the Institute's holding of GM Class H common stock. Under terms of the agreement as amended, the Institute received put options exercisable under most circumstances at \$30 per share on March 1, 1991, 1992, 1993, and 1995 for 20 million, 10 million, 10.5 million, and 15 million shares, respectively. The Institute exercised these put options at \$30 per share on March 1, 1991, March 2, 1992, and March 1, 1993. On February 15, 1995, GM and the Institute entered into an agreement under which GM assisted the Institute in selling 15 million shares of GM Class H common stock at \$38.50 per share. The March 1, 1995 put option expired unexercised.

The acquisition of Hughes Aircraft Company was accounted for as a purchase. The purchase price exceeded the net book value of Hughes Aircraft Company by \$4,244.7 million, which was assigned as follows: \$500.0 million to patents and related technology, \$125.0 million to the future economic benefits to GM of the Hughes Aircraft Company Long-Term Incentive Plan (LTIP), and \$3,619.7 million to other intangible assets, including goodwill. The amounts assigned to patents and related technology are being amortized on a straight-line basis over 15 years and other intangible assets, including goodwill, over 40 years. The amount assigned to the future economic benefits of the LTIP was fully amortized in 1990.

For the purpose of determining earnings per share and amounts available for dividends on the common stocks of General Motors, the amortization and disposal, if any, of these intangible assets is charged against earnings attributable to GM \$1-36 par value common stock and amounted to \$122.3 million, \$159.5 million, and \$123.8 million, in 1996, 1995, and 1994, respectively. The 1995 amount included a \$36.1 million charge, included in other income, for the write-off of such purchase accounting adjustments related to the disposition of certain non-strategic business units.

The earnings of Hughes and its subsidiaries since the acquisition of Hughes Aircraft Company form the base from which any dividends on the GM Class H common stock are declared. These earnings include income earned from sales to GM and its affiliates, but exclude purchase accounting adjustments (see Notes 2 and 7).

On January 16, 1997, GM and Hughes announced a series of planned transactions designed to address strategic challenges and unlock stockholder value in the three Hughes business segments. (See Note 18).

Use of Estimates in the Preparation of the Financial Statements. The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect amounts reported therein. Due to the inherent

uncertainty involved in making estimates, actual results reported in future periods may be based upon amounts that differ from those estimates.

Revenue Recognition. Sales to General Motors and affiliates and to outside customers not pursuant to long-term contracts are generally recognized as products are shipped or services are rendered. Sales under long-term contracts are recognized primarily using the percentage-of-completion (cost-to-cost) method of accounting. Under this method, sales are recorded equivalent to costs incurred plus a portion of the profit expected to be realized, determined based on the ratio of costs incurred to estimated total costs at completion. Sales under certain commercial long-term contracts are recognized using the units-of-delivery method.

Profits expected to be realized on long-term contracts are based on estimates of total sales value and costs at completion. These estimates are reviewed and revised periodically throughout the lives of the contracts, and adjustments to profits resulting from such revisions are recorded in the accounting period in which the revisions are made. Estimated losses on contracts are recorded in the period in which they are identified.

Certain contracts contain cost or performance incentives which provide for increases in profits for surpassing stated objectives and decreases in profits for failure to achieve such objectives. Amounts associated with incentives are included in estimates of total sales values when there is sufficient information to relate actual performance to the objectives.

Cash Flows. Cash equivalents consist of highly liquid investments purchased with original maturities of 90 days or less.

Net cash provided by operating activities reflects cash payments for interest and income taxes as follows:

(Dollars in Millions)	1996	1995	1994
interest	\$ 39.6	\$ 37.5	\$ 40.7
Income taxes	647.9	634.2	686.2

Accounts Receivable and Contracts in Process.

Trade receivables are principally related to longterm contracts and programs. Amounts billed under retainage provisions of contracts are not significant, and substantially all amounts are collectible within one year.

Contracts in process are stated at costs incurred plus estimated profit, less amounts billed to customers and advances and progress payments applied. Engineering, tooling, manufacturing, and applicable overhead costs, including administrative, research and development, and selling expenses, are charged to costs and expenses when incurred. Contracts in process include amounts relating to contracts with long production cycles and amounts receivable under sales-type leases, and \$546.0 million of the 1996 amount is expected to be billed after one year. Contracts in process in 1996 also include approximately \$53.8 million relating to claims, requests for equitable adjustments, and amounts withheld pending negotiation or settlement with customers. Under certain contracts with the U.S. Government, progress payments are received based on costs incurred on the respective contracts. Title to the inventories related to such contracts (included in contracts in process) vests with the U.S. Government.

Inventories. Inventories are stated at the lower of cost or market principally using the first-in, first-out (FIFO) or average cost methods.

Major Classes of Inventories

(Dollars in Millions)	1996	1995
Productive material,		
 work in process,		
and supplies	\$1,383.1	\$1,060.4
Finished product	145.4	165.1
Total	\$1,528.5	\$1,225.5

Property and Depreciation. Property is carried at cost. Depreciation of property is provided for based on estimated useful lives (3 to 45 years) generally using accelerated methods.

Telecommunications and Other Equipment.

Telecommunications and other equipment includes satellite transponders and other equipment subject to operating leases or service agreements. Such equipment is carried at Hughes' direct and indirect manufacturing cost and is amortized over the estimated useful lives (7 to 23 years) using the straight-line method. The net book value of equipment subject to operating leases was \$412.4 million and \$299.8 million at December 31, 1996 and 1995, respectively.

Intangible Assets. Intangible assets, principally the excess of cost over the fair value of identifiable net assets of purchased businesses, are amortized using the straight-line method over periods not exceeding 40 years. Hughes periodically evaluates the recoverability of goodwill and other intangible assets by assessing whether the unamortized intangible asset can be recovered over its remaining life through undiscounted cash flows generated by underlying tangible assets.

Income Taxes. The provision for income taxes is based on reported income before income taxes.

Deferred income tax assets and liabilities reflect the

impact of temporary differences between the amounts of assets and liabilities recognized for financial reporting purposes and such amounts recognized for tax purposes, as measured by applying currently enacted tax laws. Provision has been made for U.S. Federal income taxes to be paid on that portion of the undistributed earnings of foreign subsidiaries that has not been deemed permanently reinvested.

Hughes and its domestic subsidiaries join with General Motors in filing a consolidated U.S. Federal income tax return. The portion of the consolidated income tax liability recorded by Hughes is generally equivalent to the liability it would have incurred on a separate return basis.

Research and Development. Expenditures for research and development are charged to costs and expenses as incurred and amounted to \$730.0 million in 1996, \$761.7 million in 1995, and \$699.3 million in 1994.

Financial Instruments. Hughes enters into foreign exchange-forward contracts to reduce its exposure to fluctuations in foreign exchange rates. Foreign exchange-forward contracts are accounted for as hedges to the extent they are designated as, and are effective as, hedges of firm foreign currency commitments.

Foreign Currency Transactions. Foreign currency transaction net gains (losses) included in consolidated operating results amounted to \$5.4 million in 1996, (\$0.5) million in 1995, and (\$4.2) million in 1994.

Market and Credit Risk Concentrations. Sales under United States Government contracts were 34.5%, 35.5%, and 37.6% of net sales in 1996, 1995, and 1994, respectively. Sales to General Motors and affili-

ates, consisting of various automotive electronic component parts, were 32.3% of total sales in 1996, and 35.2% in 1995 and 1994.

Financial instruments which potentially subject Hughes to concentrations of credit risk consist principally of highly liquid investments purchased with original maturities of 90 days or less. Hughes places these investments with high-quality counterparties and, by policy, limits the amount of credit exposure to any one counterparty.

Accounting Changes. Effective January 1, 1996, Hughes adopted Statement of Financial Accounting Standards (SFAS) No. 123, Accounting for Stock-Based Compensation, and as permitted by this standard, will continue to apply the recognition and measurement principles of Accounting Principles Board Opinion No. 25 to its stock options. Hughes has calculated the pro forma effects of applying SFAS No. 123 and determined that such effects are not significant in relation to reported net income and earnings per share.

Effective January 1, 1996, Hughes also adopted SFAS No. 121, Accounting for the Impairment of Long-Lived Assets and for Long-Lived Assets to Be Disposed Of. This Statement establishes accounting standards for the impairment of long-lived assets, certain identifiable intangibles, and goodwill related to those assets to be held and used, and for longlived assets and certain identifiable intangibles to be disposed of. The adoption of this new accounting standard did not have a material effect on Hughes' consolidated operating results or financial position.

Effective January 1, 1994, Hughes adopted SFAS No. 112, Employers' Accounting for Postemployment Benefits. The Statement requires accrual of the costs of benefits provided to former or inactive employees after employment, but before retirement. The unfavorable cumulative effect of adopting this Standard was \$30.4 million, net of income taxes of

\$19.2 million, or \$0.08 per share of GM Class H common stock. The charge primarily related to extended disability benefits which are accrued on a service-driven basis.

NOTE 2: RELATED-PARTY TRANSACTIONS

Sales, Purchases, and Administrative Expenses.

The amounts due from and to GM and affiliates result from sales of products to and purchases of materials and services from units controlled by GM. Purchases from GM and affiliates, including computer systems services provided by Electronic Data Systems Corporation prior to its split-off from GM. and common administrative expenses allocated by GM, amounted to approximately \$77.9 million, \$233.7 million, and \$257.1 million, in 1996, 1995, and 1994, respectively.

Incentive Plans. Certain eligible employees of Hughes participate in various incentive plans of GM and its subsidiaries.

NOTE 3: INCENTIVE PLAN

Under the Hughes Electronics Corporation Incentive Plan (the Plan), as approved by the GM Board of Directors in 1987, 1992, and 1995. shares. rights, or options to acquire up to 20 million shares of GM Class H common stock may be granted through May 31, 1997.

The GM Executive Compensation Committee may grant options and other rights to acquire shares of GM Class H common stock under the provisions of the Plan. The option price is equal to 100% of the fair market value of GM Class H common stock on the date the options are granted. These nonqualified options generally expire 10 years from the dates of grant and are subject to earlier termination under certain conditions.

Changes in the status of outstanding options were as follows:

GM Class H common stock	Shares Under Option	Weighted-Average Exercise Price
Outstanding at January 1, 1994	6,366,008	\$25.19
Granted	1,612,640	36.75
Exercised	(712,107)	24.48
Terminated	(202,220)	34.22
Outstanding at December 31, 1994	7,064,321	27.64
Granted	1,537,350	39.94
- Exercised	(1,929,393)	24.81
Terminated	(14,425)	34.17
Outstanding at December 31, 1995	6,657,853	31.29
Granted	1,501,900	61.31
Exercised	(864,889)	28.58
Terminated	(128,075)	42.94
Outstanding at December 31, 1996	7,166,789	\$37.70
Exercisable at December 31, 1996	4,965,289	\$30.40

The following table summarizes information about the Plan stock options outstanding at December 31, 1996:

Range of Exercise Prices	Number Outstanding	Weighted-Average Remaining Contractual Life (years)	Weighted- Average Exercise Price	Number Exercisable	Weighted- Average Exercise Price
\$15.00 to \$24.99	829,669	4.6	\$20.74	829,669	\$20.74
25.00 to 34.99	9 2,179,755	5.5	27.36	2,179,755	27.36
35.00 to 44.99	9 2,692,090	7.9	38.45	1,955,865	37.89
45.00 to 54.9	9 —	-			
.55.00 to 65.0	0 1,465,275	9.3	61.31	_	-
\$15.00 to \$65.0	0 7,166,789	7.1	\$37.70	4,965,289	\$30.40

At December 31, 1996, the maximum number of shares for which additional options and other rights may be granted under the Plan was 2,314,449 shares.

NOTE 4: PENSION PROGRAMS

Hughes' total pension expense amounted to \$97.5 million in 1996, \$39.0 million in 1995, and \$54.9 million in 1994.

Substantially all the employees of Delco
Electronics participate in the defined benefit pension
plans of General Motors. Plans covering represented

employees generally provide benefits of negotiated stated amounts for each year of service as well as significant supplemental benefits for employees who retire with 30 years of service before normal retirement age. The benefits provided by the plans covering salaried employees are generally based on years of service and the employee's salary history. Certain nonqualified pension plans covering executives are

based on targeted wage replacement percentages and are unfunded. The accumulated plan benefit obligation and plan net assets for the employees of Delco Electronics are not determined separately; however, GM charged Delco Electronics \$53.1 million, \$50.9 million, and \$93.3 million, for benefits carned by these employees in 1996, 1995, and 1994, respectively.

Substantially all of Hughes' non-automotive employees are covered by Hughes' bargaining and non-bargaining defined benefit retirement plans. Benefits are based on years of service and compensation earned during a specified period of time before retirement. Additionally, an unfunded, nonqualified pension plan covers certain executives. The net pension expense (credit), related to these plans covering non-automotive employees. included the components shown below:

(Dollars in Millions)	1996	1995	1994
Benefits earned during the year	\$ 161.3	\$ 110.5	\$ 146.7
Interest accrued on benefits earned in prior years	413.4	403.6	37 7.0
Actual return on assets	(1,253.1)	(1,198.3)	(104.7)
Net amortization and deferral	722.8	672.3	(457.4)
Net retirement plan expense (credit)	\$ 44.4	\$ (11.9)	\$ (38.4)

Costs are actuarially determined using the projected unit credit method and are funded in accordance with U.S. Government cost accounting standards to the extent such costs are tax-deductible. SFAS No. 87, Employers' Accounting for Pensions, requires the recognition of an additional pension liability to increase the amounts recorded up to the unfunded accumulated benefit obligation. The adjustment required to recognize the minimum pension liability required by SFAS No. 87 is recorded as an intangible asset to the extent of unrecognized prior service cost and the remainder, net of applicable deferred income taxes, is recorded as a reduction of Stockholder's Equity. At December 31, 1996 and 1995, the additional minimum pension liability recorded was \$210.8 million and \$204.9 million, respectively, of which \$113.5 million and \$108.6 million, respectively, was recorded as a reduction of Stockholder's Equity.

Plan assets are invested primarily in listed common stock, cash and short-term investment funds. U.S. Government securities, and other investments.

The weighted-average discount rates used in determining the actuarial present values of the projected benefit obligation shown in the table on the following page were 7.5% and 7.25% at December 31, 1996 and 1995, respectively. The rate of increase in future compensation levels was 5.0% in 1996 and 1995. The expected long-term rate of return on assets used in determining pension cost was 9.5% in 1996 and 1995.

The table on the following page sets forth the funded status of the Hughes non-automotive employee plans and the amounts included in the Consolidated Balance Sheet at December 31, 1996 and 1995:

	1996		1995	
(Dollars in Millions)	Assets Exceed Accumulated Benefits	Accumulated Benefits Exceed Assets	Assets Exceed Accumulated Benefits	Accumulated Benefits Exceed Assets
Actuarial present value of benefits based on				
service to date and present pay levels				
Vested	\$ 4,437.0	\$ 330.7	\$ 4,685.3	\$ 327.5
Nonvested	403.7	3.9	225.6	4.7
Accumulated benefit obligation	4,840.7	334.6	4,910.9	332.2
Additional amounts related to				
projected pay increases	549.3	13.8	456.7	11.0
Total projected benefit obligation based				
on service to date	5,390.0	348.4	5,367.6	343.2
Plan assets at fair value	7,094.9	70.2	6,397.7	65.9
Plan assets in excess of (less than)				
projected benefit obligation	1,704.9	(278.2)	1,030.1	(277.3)
Unamortized net amount resulting from changes				
in plan experience and actuarial assumptions	(564.0)	208.6	173.3	193.3
Unamortized net asset at date of adoption	(106.6)	-	(161.9)	•
Unamortized net amount resulting from changes				
in plan provisions	(13.0)	15.9	(13.8)	22.6
Adjustment for unfunded pension liabilities	-	(210.8)	•	(204.9)
Net prepaid pension cost (accrued liability)	\$ 1,021.3	\$ (264.5)	\$ 1,027.7	S (266.3)

NOTE 5: OTHER POSTRETIREMENT BENEFITS

Substantially all of the employees of Delco Electronics participate in various postretirement medical, dental, vision, and life insurance plans of General Motors. Hughes maintains a program for eligible non-automotive retirees to participate in health care and life insurance benefits generally until they reach age 65. Qualified employees who elected to participate in the Hughes contributory defined benefit pension plans may become eligible for these benefits if they retire from Hughes between the ages of 55 and 65.

The total non-pension postretirement benefit cost of Hughes and its subsidiaries included the components set forth as follows:

1996	1995	1994
\$ 36.2	\$ 33.9	\$ 50.1
116.5	123.3	130.3
(11.0)	(16.5)	7.6
\$141.7	\$140.7	\$188.0
	\$ 36.2 116.5 (11.0)	\$ 36.2

The following table displays the components of Hughes' obligation recognized for postretirement benefit plans included in the Consolidated Balance Sheet at December 31, 1996 and 1995:

(Dollars in Millions)	1996	1995
Accumulated postretirement benefit obligation attributable to		
Current retirees	\$ 808.3	\$ 857.1
Fully eligible active plan participants	254.2	221.1
Other active plan participants	562.0	547.5
Accumulated postretirement benefit obligation	1,624.5	1,625.7
Unrecognized net amount resulting from changes in		
plan experience and actuarial assumptions	103.7	62.4
Net postretirement benefit obligation	1,728.2	1,688.1
Less current portion	69.3	77.5
Net long-term postretirement benefit obligation	\$1,658.9	\$1,610.6

The assumed weighted-average discount rates used in determining the actuarial present value of the accumulated postretirement benefit obligation were 7.56% and 7.25% at December 31, 1996 and 1995, respectively. The assumed weighted-average rate of increase in future compensation levels related to pay-related life insurance benefits was 4.5% at December 31, 1996 and 4.4% at December 31, 1995.

The assumed weighted-average health care cost trend rate was 7.91% in 1996, decreasing linearly each successive year until it reaches 5.31% in 2006, after which it remains constant. A one percentage point increase in each year of this annual trend rate would increase the accumulated postretirement benefit obligation at December 31, 1996 by approximately \$150 million, and increase the service and interest cost components of the 1996 postretirement benefit expense by approximately \$17 million.

Hughes has disclosed in the consolidated financial statements certain amounts associated with estimated future postretirement benefits other than pensions and characterized such amounts as "accumulated postretirement benefit obligations," "liabilities," or "obligations." Notwithstanding the recording of such amounts and the use of these terms. Hughes does not admit or otherwise acknowledge that such amounts or existing postretirement benefit plans of Hughes (other than pensions) represent legally enforceable liabilities of Hughes.

NOTE 6: INCOME TAXES

The income tax provision consisted of the following:

(Dollars in Millions)	1996	1995	1994
Taxes currently payable			
U.S. Federal	\$ 390.7	\$ 664.6	\$ 532.2
Foreign	11.2	13.4	10.3
U.S. state and local	102.8	138.4	100.5
Total	504.7	816.4	643.0
Deferred tax (assets) liabilities - net			
U.S. Federal	97.9	(130.0)	(62.2)
Foreign	0.3	2.0	1.3
U.S. state and local	2.8	(42.8)	(9.3)
Total	101.0	(170.8)	(70.2)
Total income tax provision	\$ 605.7	\$ 645.6	\$ 572.8*

^{*} Excluding effect of accounting change.

The deferred income tax benefit in 1994 included a \$63.0 million credit that resulted from an adjustment to the beginning of the year valuation allowance because of a change in circumstances with respect to Hughes' ability to realize the benefit from a capital loss carryforward.

Income before income taxes included the following components:

(Dollars in Millions)	1996	1995	1994
U.S. income	\$1,547.1	\$1,494.7	\$1,448.1
Foreign income	87.5	99.2	80.5
Total	\$1,634.6	\$1,593.9	\$1,528.6

The consolidated income tax provision was different than the amount computed using the U.S. statutory income tax rate for the reasons set forth in the following table:

\$ 557.9 62.2	\$ 535.0
62.2	
	59.3
55.8	43.3
(22.2)	(19.2)
•	(63.0)
(8.1)	17.4
\$ 645.6	\$ 572.8*
-	(22.2)

^{*} Excluding effect of accounting change.
